

# SIPHOS-12

## Sodium Acid Phosphate with Vitamin B12 Injection

### COMPOSITION :

#### Each ml contains:

Sodium acid phosphate B.P	40% w/v
Equi. to Elemental Phosphorous	79.4 mg
Cynocobalamin B.P	50 mcg
Methyl Hydroxybenzoate B.P	0.18% w/v
Propyl Hydroxybenzoate B.P	0.02% w/v
Water for injection B.P	q.s.

### INDICATION :

It is indicated for infertility cases such as under developed Genitalia, Delayed, maturity, Anoestrus and maintainance of pregnancy. It is very effective to treat Metabolic disorders such as : Post parturient Haemoglobinuria, Hypophosphataemia, Ketosis & Milk Fever. It is useful in General debility conditions and in the treatment of Bloat, Tetany, pica & Rickets in lambs. Folic Acid acts in synergy in the formulation of DNA, and deficiencies can have serious consequences, both in performance horses with a high tissue turnover rate, and in pregnancy and growth of young foals. Clinically the first sign of deficiency is anaemia. Vitamin B12 is essential to the formation of FOLIC ACID. It is useful to stimulate appetite in horses, and is essential maintainance of adequate blood counts.

### DOSAGE AND ADMINISTRATION :

Large animals : 5-10 ml daily for alternate days.

Small animals : 2-5 ml daily dose can be adjusted according to the phosphorous need of the animal. It is advisable to administer half the dose by s/c route in several places.

### WITHDRAWAL PERIOD :

Nil

### STORAGE :

Store at a temperature not exceeding 30°C.
